Repository Introduction

Welcome to our Awesome List of Generative AI resources! This repository is a curated collection of references in the dynamic field of Generative AI, equipped with various sources such as academic papers, technical articles, online courses, tutorials, and software.

Structure:

1. Sections: Each section represents a different Generative AI-related category (e.g., LLMs, prompt engineering, image synthesis, educational resources, etc.). The Inboxes are the more general references of a category. When a new category emerges, it becomes a specific subsection.
2. References within sections: Inside each section, references are listed in reverse chronological order, with the most recent one at the top. This order signifies the ever-evolving landscape of Generative AI, keeping you up-to-date with the latest developments.

This repository is designed to offer you the most recent advancements at your fingertips, allowing you to explore the depth of older resources at your own pace. It's regularly updated, ensuring you're always on track with the rapidly progressing world of Generative AI.

Contribute to Our Repository

Your contributions are welcome and greatly appreciated! If you have a valuable resource that you believe should be on this list, or if you see any outdated information, please make a Pull Request. This will help us maintain the quality and relevance of our Awesome List.

Follow this roadmap, keep learning, and enjoy your journey through Generative AI!

Secure your spot now to avoid being left out of the exclusive closed community.

Limited availability → act quickly or lose this invaluable opportunity!

Book before 31st August 2023 👉 to avoid a price hike.

- Mentorship calls
- MLOps, Generative AI, NLP, Computer Vision, ML System Design, hands-on project building, and code algorithms from scratch.
- Building Projects and Portfolio
- 230+ Hours of Live sessions

- Lifetime access to recordings
- Resume Building
- LinkedIn Personal Branding for 10x Growth
- 100+ Interview Questions and Preparation
- Closed community of professionals with the same mindset
- Study Group on Discord
- Placement Support (Referrals)

Want to join the Live Cohort Ping me Hi here:

Share your requirements with me at **connect@himanshuramchandani.co** I will customize the roadmap for you.

Session Structure →

1. Topic Understanding
2. Real-world examples
3. Implementation in Python
4. Interview questions on that topic
5. Questions to implement in programming
6. Reading one blog or reacting on the resource in the machine learning space
7. Study one company hiring in Machine Learning at a time, and analyze their products and services.
8. Discussion on How to be better?
